

AIR BEARING SPINDLE:

The Spindle Air Bearing system is mainly used to provide self-diagnostic solutions for metal cutting, robots, and industrial applications.

FOR INDUSTRIAL USE:

Grinding, Engraving, Drilling (Glass, AL, SUS, Acyyl, Ceramic, Dental etc) Centrifugal Super high speed & Super Precision, PCB-Board Drilling, Auto Drill Changer

FOR SEMICONDUCTOR:

Difficult – to – cot – material such as (PCB, Silicon Wafer, Ceramic, Glass, QFN etc
